1. Claims 20 (second occurrence) through 30 have been renumbered as claims 21-29 respectively, because there are two claims 20, and the restriction is directed to the renumbered claims.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5,21-24 are, drawn to \*the subcombination of a container section (front panel)\*\*, classified in class \*220\*\*, subclass \*600.\*\*.
- II. Claims 6-20 and 25-29 are\*\*\*, drawn to \*\*a combination of a dispenser having a front panel and side panels.\*, classified in class \*\*221\*, subclass \*63.\*\*.

3. Inventions of Group I and of Group II\*\*\* are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because \*the subcombination of the front panel recites specific structure to a top, bottom and a middle section, which are not recited in the combination. \*\*. The subcombination has separate utility such as \*\*a front panel could be utilized as a cover with any other type of container to either store or dispense any other article or product.

\*

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
